BOARD OF VISITORS

JOHN P. THOMAS, ESQ., *Chairman*_____Charleston, S. C.
COL. JAMES H. HAMMOND_____Columbia, S. C.
COL. JAMES G. PADGETT_____Walterboro, S. C.
A. E. HUTCHISON, ESQ._____Rock Hill, S. C.
J. R. WESTMORELAND, ESQ._____Pacolet, S. C.
H. D. STILL, ESQ._____Blackville, S. C.
COL. D. A. SPIVEY_____Conway, S. C.

EX-OFFICIO

HIS EXCELLENCY, JOHN G. RICHARDS, Governor, Columbia, S. C.
GEN. JAMES C. DOZIER, Adjutant General, Columbia, S. C.
HON. JAMES H. HOPE, State Superintendent of Education, Columbia, S. C.
W. S. LEGARE, ESQ., Chairman Military Committee, Senate, Charleston, S. C.
K. R. KREPS, ESQ., Chairman Military Committee, House of Representatives, Columbia, S. C.

OFFICERS AND FACULTY

COLONEL O. J. BOND, B.S., LL.D.
President.

MILITARY STAFF

MAJOR WM. C. MILLER, U. S. A.
Commandant of Cadets

MAJOR A. V. RINEARSON, U. S. A.

MAJOR E. M. TILLER,
Quartermaster.

MAJOR R. S. CATHCART, M.D.,
Surgeon.

CAPTAIN C. L. HAIR,
Adjutant.

CAPTAIN LEWIS SIMONS, U. S. A.

CAPTAIN D. S. MCALISTER,
Director of Cadet Affairs.

CAPTAIN L. A. PROUTY,
Registrar.

CAPTAIN ALSTON DEAS, U. S. A.

LIEUTENANT GEORGE J. LOUPRET, U. S. A.

COLLEGE FACULTY

(*In Order of Seniority*)

COLONEL O. J. BOND, B.S., LL.D.,
Professor of Mathematics.

MAJOR WM. C. MILLER, Infantry, U. S. A.,
Professor of Military Science and Tactics.

MAJOR HUGH SWINTON MCGILLIVRAY, A.B., Ph.D.,
Professor of English.

MAJOR LOUIS KNOX, B.S., M.S.,
Professor of Chemistry and Biology.

MAJOR LOUIS SHEPHERD LETELLIER, M.S.,
Professor of Civil Engineering.

MAJOR NEWLAND FARNSWORTH SMITH, Ph.D.,
Professor of Physics.

MAJOR SMITH JOHNS WILLIAMS, A.B., A.M.,
Professor of History.

MAJOR HAROLD CARTER WINSHIP, A.B., A.M.,
Professor of Modern Languages.

MAJOR A. V. RINEARSON, Coast Artillery, U. S. A.,
Assistant Professor of Military Science and Tactics.

CAPTAIN CLIFTON LECROY HAIR, B.S.,
Associate Professor of Mathematics.

CAPTAIN CARL FRANCIS MYERS, JR., B.S.,
Assistant Professor of Mathematics.

CAPTAIN JOHN ANDERSON, C.E.,
Associate Professor of Engineering and Drawing.

CAPTAIN CECIL ST. JOHN PHILLIPS, B.S.C., M.S.,
Professor of Business Administration.

CAPTAIN LEWIS SIMONS, Infantry, U. S. A.,
Assistant Professor of Military Science and Tactics.

CAPTAIN ALFRED E. DUFOUR, A.B.,
Associate Professor Modern Languages.

Captain Milton Boone Kennedy, A.B., A.M.,
Associate Professor of English.

Captain James Karl Coleman, B.S., A.M.,
Associate Professor of History.

Captain Leonard Augustus Prouty, A.B.,
Professor of Psychology and Education.

Captain Alston Deas, U. S. A.,
Assistant Professor of Military Science and Tactics.

Lieutenant Ralph Milledge Byrd, B.S., M.S.,
Assistant Professor of Chemistry.

Lieutenant George J. Loupret, Coast Artillery, U. S. A.
Assistant Professor of Military Science and Tactics.

Lieutenant Ralph Muse Lyon, B.S., A.M.,
Assistant Professor of History.

Lieutenant Luther Brenner, B.S., M.S.,
Assistant Professor of Physics.

Lieutenant Rene H. Drioult, LL.D.,
Assistant Professor of Modern Languages.

Lieutenant St. Julien Ravenel Childs, A.B.,
Assistant Professor of History.

Lieutenant John Alvah Lee Saunders, B.S.,
Assistant Professor of Mathematics.

Lieutenant Charles T. Razor, B.S.,
Assistant Professor of Physics.

Lieutenant J. Alvin Tiedemann, B.S.,
Assistant Professor of Business Administration.

Lieutenant James Geraty Harrison, B.S., B.Litt.,
Assistant Professor of English.

Lieutenant John Isaac Owen, A.B., A.M.,
Assistant Professor of English.

Lieutenant Joe Henry Watkins, B.S.,
Assistant Professor of Chemistry.

Lieutenant Ephraim Clark Seabrook, B.S.,
Assistant Professor of Mathematics.

Lieutenant Granville Paul Smith,
Assistant Professor of History.

Lieutenant Hugh Dudley Ussery, M.A.,
Assistant Professor of Physics.

Lieutenant Edward Hutchings Anderson, M.S.,
Assistant Professor of Business Administration.

Lieutenant Hilliard Galbraith Haynes, A.B., B.S. in C.E,
Assistant Professor of Engineering.

Lieutenant William Sylvester Price, A.B.,
Assistant Professor of Modern Languages.

Lieutenant Raymond Halliday, B.A.,
Assistant Professor of Modern Languages.

Lieutenant Francis Burt Fitch, Jr., C.E.,
Assistant Professor of Engineering.

Mr. Carl H. Metz,
Director and Instructor of the Band.

Mr. J. M. Leland,
Y. M. C. A. Secretary.

Mrs. Kate M. Gaillard,
Librarian.

Mrs. A. E. Malloy,
Matron of Hospital.

Mrs. B. B. Polhemus,
Secretary to the President.

Miss Isabel Stoney,
Secretary to the Quartermaster.

Miss Sessie Gaillard,
Secretary to the Commandant.

Mrs. F. L. Avinger,
Matron of Mess Hall.

Part I

HISTORICAL SKETCH

PREVIOUS to the year 1842, the State of South Carolina had two depositories for its arms and munitions of war—one known as The Citadel, in the City of Charleston; the other known as The Arsenal, in the City of Columbia. These were guarded by companies of enlisted men and trained officers, and were maintained at an expense of twenty-four thousand dollars per annum.

It was Governor Richardson who made the suggestion that these garrisons be replaced by young men, who, while serving as guards, should receive military training, and instruction in the practical and mechanical arts. Under the administration of his successor, Governor Hammond, an Act of the Legislature was passed, on December 20, 1842, creating The Citadel and Arsenal Academies.

The Board appointed by the Governor to carry out the purpose of the Act lost no time in performing its duty, and the Faculty of The Citadel was elected on February 23rd following. By the twentieth of March, both The Citadel and The Arsenal were in operation.

In arranging the course of studies for The Citadel, the report of the Board to the General Assembly says:

"The Board has aimed at a system of education at once scientific and practical, and which, if their original design is carried out, will eminently qualify the cadets there taught for almost any station and condition of life.

"During the course, besides the usual branches taught at the primary schools in the State, they will be instructed in the history of South Carolina, modern history, the French language, every department of mathematics, bookkeeping, rhetoric, moral philosophy, architectural and topographical drawing, natural philosophy, chemistry, geology, minerology, botany, civil and military

engineering, the constitutional law of the United States, and the law of nations. In addition to that course, they will be instructed in the duties of the soldier, the school of the company and the battalion, the science of war, the evolution of the line, and the duties of commissioned officers."

The Arsenal, at first co-equal with The Citadel, was soon incorporated with it, and had for its special function the instruction and training of the recruits forming what was known as the Fourth Class.

The first class, numbering six men, was graduated in 1846. C. C. Tew, the first honor man of his class, and proto-graduate of the institution, afterwards founded the Hillsboro Military Academy, North Carolina, was Colonel of North Carolina troops in the Confederate Army, and was killed at Sharpsburg, September, 1862, while commanding Anderson's brigade.

The value to the State of the military training given at The Citadel is strikingly shown by the fact that, of the two hundred and forty graduates before the close of the War between the States, about two hundred were officers in the Confederate service, and forty-three laid down their lives upon the battlefield. The list of Citadel officers in that great conflict is an honor roll of which any institution may well be proud.

There are two dates in the history of the State Military Academies which mark the boundaries of this greatest military struggle of the century. Between January 9, 1861, and May 9, 1865, what a tragic history was enacted!

On the former date, Maj. P. F. Stevens, Superintendent, and a graduate of The Citadel, in command of a detachment of Citadel Cadets manning a battery of 24-pounders on Morris Island drove off the steamer, "Star of the West," which was attempting the relief of Fort Sumter—thus firing the first hostile shot of the War.

On the latter date, Capt. J. P. Thomas, Superintendent of The Arsenal, and also a gradaute of The Citadel, with the

cadets of his command, had a skirmish with Stoneman's raiders, near Williamston, S. C., thus firing the last shot of the War delivered by any organized body of troops east of the Mississippi River.

At the present time, the corps of cadets has an annual drill for the "Star of the West" medal, a handsome trophy for the best drilled cadet of the corps, presented to the institution many years ago by Dr. B. H. Teague, a veteran of the War. This medal gets its name from a piece of oak wood, in the form of a star, taken from the historic vessel.

At the fall of Charleston, in February, 1865, The Citadel was occupied by Federal troops. The corps of cadets was at that time in the field in the upper part of the State, and never returned to the institution, which continued in the hands of the United States military authorities, in spite of the best effort of the State to recover it, until 1881.

In that year, Governor Hagood said in his annual message to the General Assembly:

"The State Military Academy at Charleston has been suspended in its operations since the late Civil War. This has been due to the fact that the building known as The Citadel, in which it has its seat, has been since the close of the war in the possession of the United States authorities, and has been used by them until recently as a military post.

"It is understood that the General Government is now prepared to restore it to the custody of the State. It is desirable that this property be recovered, and again devoted to the purpose of higher education, in the facilities for which our needs are greater than the source of supply.

"A measure will probably be submitted to you at this session to accomplish this purpose and you will permit me to say that, in my judgment, it is now practicable to reopen the school, and it ought to be done."

An Act to authorize the reopening of the South Carolina Military Academy was passed by the General Assembly, and approved January 31, 1882.

The Citadel was reopened on October 1, 1882, with 189 cadets, and has been in continuous and successful operation ever since.

In 1910, the Legislature fixed the title of the institution as "The Citadel, The Military College of South Carolina."

In 1918, the City of Charleston offered the State a magnificent tract of nearly 200 acres of land adjacent to Hampton Park, and beautifully situated on the banks of the Ashley River, for a "Greater Citadel." The Legislature accepted the offer and made in 1919 and 1920 appropriations for the necessary buildings.

On September 20, 1922, the college opened in its commodious new quarters, which had been provided at a cost of more than a million dollars. The facilities in laboratories and classrooms have been largely increased, dormitory accommodations have been enlarged forty per cent. and ample and beautiful grounds for all military work and athletic activities have been provided.

The "Mary Bennett Murray Hospital," erected at a cost of $60,000 by a public-spirited citizen of Charleston, was presented to the college in 1923, and is one of the most complete and well-equipped infirmaries in the South. In this year, also, the Alumni Gymnasium was erected with a fund of $50,000, subscribed by graduates and former cadets.

During the year 1926, a new dormitory was constructed to accomodate 350 additional cadets. This building is called "Andrew B. Murray Barracks" in honor of the citizen of Charleston who generously contributed half the cost of construction.

In the year 1927, two faculty houses were constructed on the campus, one for the president, and the other, containing four apartments, for the commandant, the quartermaster and

two of the professors. Most of the professors have quarters in the Old Citadel at Marion Square.

COLLEGE YEAR

The college year begins the middle of September and ends about the middle of June.

It is divided into two terms of four months each, and examinations are held at the end of each term, after which, reports showing the records of the cadets in studies and conduct are sent to parents and guardians.

FURLOUGHS

A suspension of work for ten days, including Christmas Day and New Year's Day, is required by law.

The corps of cadets is furloughed from Commencement Day, in June, until the opening of the following session in September. There are no Easter holidays.

During the session, furloughs will be granted to cadets only for some urgent reason, and parents are requested not to apply for leaves of absence for their sons unless in case of necessity. In every case the reason for the furlough will be stated, and it must be left to The Citadel authorities to determine whether the circumstances warrant the approval of the furlough. Parents applying for the admission of their sons to The Citadel relinquish control over them to the authorities of the institution. The time which is allotted to studies and military work is essential for the completion of the required courses, so that cadets must not be absent except when it is absolutely necessary; and the whole system of discipline depends upon uniform requirements for all, and no special privileges to any.

CITADEL LIBRARY

SYSTEM OF MANAGEMENT

The Citadel is essentially a military college, and all the students live in Cadet Barracks, under the same discipline as in use at West Point. From reveille to taps, the Citadel cadet passes a full and busy day, every hour of his time being accounted for, and its appropriate task performed.

The regular habits of study and living thus formed, the attention to duty, obedience to authority, and love of order inculcated, are considered among the most valuable features of the education given. While few of the graduates of the College enter the military profession, hundreds in all the walks of civil life attest to the high value of the training received at the institution.

Freshmen are quartered in a separate barracks from upperclassmen, except for carefully selected cadet officers and noncommissioned officers, who are detailed as their instructors. Only these upper-classmen, and others who may be on temporary official business, are permitted to visit the freshmen barracks.

RESERVE OFFICERS' TRAINING CORPS

At The Citadel there are two Reserve Officers' Training Corps units, one Infantry and one Coast Artillery. For instruction in military branch subjects, the four Infantry and four Coast Artillery companies are grouped into unit battalions. For quartering and administration the cadets are organized into a regiment of two battalions, each composed of two Infantry and two Coast Artillery companies. Competent army officers are detailed for the military instruction of the Infantry and Coast Artillery units of the R. O. T. C., and the character of the work done is of a high order, qualifying the graduates for commissions in the Officers' Reserve Corps of the United States Army. The military spirit of the Corps of Cadets of the Citadel has always been noteworthy, and the training which the cadets receive has met

the heartiest commendation of the War Department, which for many years, while such a classification existed, rated the institution as a "Distinguished College."

During the four years of his course at The Citadel, the student receives from the government an allowance of $74.30 for uniforms, and in his junior and senior years a commutation of $9.00 per month for rations.

The junior class usually goes into camp for target practice in the spring on the government rifle range near Mt. Pleasant, across the bay from Charleston. Each cadet attending this camp fires the course prescribed for the Regular Army, and from the participants a rifle team is selected to represent the State of South Carolina at the National Matches at Camp Perry, Ohio.

At the close of the session in June of each year, the members of the Junior Class in the Infantry and Coast Artillery of the Reserve Officers' Training Corps go to the government camps for the special training provided by the War Department for the Senior Division of the R. O. T. C. These encampments are closely supervised and furnish an excellent opportunity for the cadet to get a pleasant vacation and to meet college men from other sections of the country. Transportation, meals, housing, medical attendance and uniforms, and pay at the rate of .70c per day is given those attending camp.

All cadets at The Citadel, as far as the quota given by the United States War Department permits, are in the R. O. T. C. unless they fail to conform to War Department physical standards or are dropped for cause.

RELIGIOUS SERVICES

The religious training of cadets is provided by daily chapel services attended by the corps, by regular Sunday morning service conducted in the Citadel Chapel by the various ministers of the city, and by the Bible-study groups and other activities of the Cadet Y. M. C. A.

The military system works not only for the good health but for the morals of the cadets. Moreover, the barracks life of the students precludes much waste of time or loss of character.

Cleanliness, temperance, regularity and courtesy are insisted upon, and personal responsibility and a high sense of honor are stimulated and developed.

LIBRARY AND READING ROOM

The library contains a large number of books of reference for all the departments of the college, besides being well supplied with works of standard and current fiction. It is catalogued, and in charge of a competent librarian.

The reading room is a large, airy and well-lighted room on the ground floor, directly accessible from the Quadrangle, and is supplied with the current magazines.

Y. M. C. A.

The Citadel Y. M. C. A. was organized in 1886, and is a valuable influence in the student life of the college.

While the Faculty has oversight of the work, it is an institution of the boys, for the boys, and by the boys. Here all meet on equal terms; the old men are welcomed back, and there is thrown around the new student a wholesome and affectionate atmosphere, which enables him to meet more courageously and successfully the hard battles that every student must fight.

The supervision and extension of the work is in the hands of a Student Committee, Cabinet, and an Executive Secretary, who devotes his entire time to the work in The Citadel.

The regular weekly meetings of the Association are addressed by prominent clergymen, professional and business men of the city. At frequent intervals, these meetings are addressed by noted men from the greater religious, secular, and educational institutions of the country, speakers brought here by the city

organization. Contact with these men is an education in itself, and the moral and religious influence of their helpful messages is most profound. A series of "vocational talks" finds place among the lectures delivered at these meetings.

The efficiency of Association leaders and the effectiveness of the work are greatly increased by the yearly attendance of cadets at county, state, and international conventions and summer schools. Bible study classes are organized each year, and taught by members of the Faculty and Senior Class, and the religious leaders of the city. Mission study is also provided for, and from time to time the students' horizon is broadened through lectures by Foreign Work representatives. The religious and economic problems of the homeland are also given due consideration.

A *Handbook*, published by the Association, is presented each year to the students at the beginning of the first term.

The Faculty heartily commends the work of the Association, and it is recommended that every parent or guardian encourage the student under his care to affiliate himself with the Y. M. C. A. as soon as he enters The Citadel.

ATHLETICS

The climate of Charleston permits open-air exercises throughout the year; and the setting-up exercises, daily drill, etc., and the sports of the cadets, furnish the best means of securing bodily health and growth. Special attention may be given those cadets who may require particular exercises for specific needs.

The coaches of the various athletic teams are competent and experienced and use due care to prevent injurious training on the part of cadets who engage in athletics.

It is the policy of the institution to give every reasonable encouragement to athletics, and to see that all contests are conducted on a clean, amateur basis. The athletic interests are controlled by a well-organized athletic association, under the super-

vision of a Faculty Committee. The Citadel is a member of the Southern Intercollegiate Athletic Association, and it is represented at the annual track and field meet of this organization.

A wide range of opportunity is offered to the cadet to find some branch of athletics in which he may excel or from which he may derive pleasure and profit. Football, baseball, track and field sports, tennis, basketball and relay racing are the branches in which regular teams are organized. The danger of athletic sports is minimized by having the men under the direct care of competent coaches, and by strict examination by the surgeon.

While athletics are encouraged and supported by the authorities, they are firmly subordinated to the prescribed work of the college, and no interference that will materially hamper the progress of the cadets in their studies, or introduce irregularities into the routine of the college, is permitted.

It is the observation of the authorities that clean, well-conducted athletics in an institution of learning foster a fine spirit of loyalty and manliness. It is the purpose here to derive a full measure of this benefit, and in addition, to provide wholesome recreation for the cadets.

HAZING

One of the bugbears of college life, which has been talked about and magnified beyond its due importance, is hazing. The practice of hazing is fortunately getting less and less common in our colleges. It is a practice which should be totally abolished, because, if countenanced at all, it almost invariably is carried to an excess by a few irresponsible students.

At the Citadel, where all the cadets live together in one barracks, as one big family, the presence of individuals who are obsessed with the idea that beatings and indignities are a part of a student's education cannot be tolerated; and no student is wanted in the corps who does not subscribe volun-

tarily to the regulations which absolutely bar hazing from the corps.

The regulations concerning hazing contained in the following resolution of the Board of Visitors, are supported and enforced by the corps of cadets.

Whereas, The statutes of the State make it unlawful for any student to engage in hazing, (XXVIII, Statutes at large, page 619), and

Whereas, This act requires the governing Boards of all colleges supported in whole or in part by the State to formulate and issue such regulations as may be necessary to enforce this law,

Therefore, be it resolved, That the Board of Visitors of The Citadel, in compliance with the law cited, hereby adopts the following regulation:

1. Every cadet will be required to subscribe to the following promise:

I,—(Name of cadet)—, hereby promise that I will not engage in hazing in any form during my connection with The Citadel.

(Signature of Cadet.)

2. In any apparent case of hazing, where the facts do not come directly under the observation of the authorities, the commandant of cadets will require each cadet in the corps to make a statement whether he was involved in the case, and, if so, the facts relating to his connection therewith. In every case where a cadet is guilty of hazing, he shall immediately withdraw from The Citadel, and the facts in the case together with the statement of the cadet will be forwarded to the Board of Visitors.

3. The acceptance of these regulations by the parents or guardian of each cadet and also by the cadet himself will be required before such cadet will be admitted to the college.

4. Hazing is defined to be striking, laying hands upon, treating with violence, or offering bodily harm to a cadet who has been connected with the college for less than one year, or other treatment of a harassing, tyrannical, abusive, insulting, or humiliating nature, or that may endanger the physical well-being of such cadet.

EXPENSES

GENERAL EXPENSES, REMISSION OF TUITION, RETURN OF FEES, PAYMENTS CLASSIFIED, UNIFORMS, SPECIAL FEES, OPTIONAL FEES, MISCELLANEOUS

NOTE: The expenses as outlined below are subject to change by the action of the Board of Visitors.

GENERAL

The Citadel is a State institution, and is not maintained for profit. Only the cost of supporting a cadet is required.

The fee for board, tuition, laundry, lights, heat, water, janitor service, and ordinary hospital attention is $250.00 for the session. This amount is required of all pay cadets, and is distributed as follows:

Board for nine months at $18.00 per month	$162.00
Tuition for nine months	40.00
Laundry, lights, heat, water, janitor service, and hospital	48.00
Total	$250.00

Juniors and Seniors receive approximately $125.00 subsistence allowance a year from the Federal Government, and the attention of parents is called to the fact that this sum, which is paid directly to the cadets, very materially decreases the general expenses when applied to their payment.

REMISSION OF TUITION

A remission of $40.00 for tuition is granted to residents of South Carolina for a period of one year, when acceptable certificates showing inability to pay are submitted through the President of The Citadel to the State Board of Public Welfare. Application must be received at the beginning of each year. The decision of the State Board is made by December 1st.

All applications for free tuition should be filed as soon after the opening of the session as possible. Remission of tuition decreases each of the installments $10.00. The necessary blanks may be secured from the President.

RETURN OF FEES

A cadet discharged during any term will not be entitled to a refund of any of the amount paid for maintenance for that term.

PAYMENTS CLASSIFIED

When a new cadet is enrolled, a $10.00 payment on account of uniforms is required. This sum is in addition to the uniform items paid in the regular installments.

FEES OF NEW PAY CADETS

Deposit on uniforms		$ 10.00

SEPTEMBER 21ST, 1929

Board	$45.00	
Uniforms	60.00	
Laundry, lights, heat, hospital, water, etc.	12.00	
*Tuition	10.00	
Books	15.00	
Athletic Fee	10.00	
Y. M. C. A. Fee	3.00	$155.00

DECEMBER 1ST, 1929

Board	36.00	
Uniforms	50.00	
Laundry, lights, heat, hospital, water, etc.	12.00	
*Tuition	10.00	$108.00

FEBRUARY 1ST, 1930

Board	36.00	
Uniforms (full dress)	50.00	
Laundry, lights, heat, hospital, water, etc.	12.00	
*Tuition	10.00	$108.00

APRIL 1ST, 1929

Board	45.00	
Laundry, lights, heat, hospital, water, etc.	12.00	
*Tuition	10.00	
Breakage fee	5.00	$ 72.00
Total		$453.00

*Except when remitted.

NOTE: The expenses listed above apply to the old pay cadets except the uniform items, which are as follows:

September 21, 1929	$35.00
December 1, 1929	35.00
February 1, 1930	15.00

FEES OF BENEFICIARY CADETS

Fees of State and of Charleston City beneficiary cadets, exclusive of uniforms, are:

SEPTEMBER 21ST, 1929

Books	$15.00	
Athletic Fee	10.00	
Y. M. C. A. Fee	3.00	$ 28.00

APRIL 1ST, 1930

Breakage Fee	5.00
	$ 33.00

NOTE: The uniform fees of beneficiary cadets are:

	SEPT. 21ST	DEC. 1ST	FEB. 1ST
New State Beneficiary Cadets	$35.00	$35.00	$33.00
Old State Beneficiary Cadets	25.00	----	----
New Charleston Beneficiary Cadets	60.00	50.00	50.00
Old Charleston Beneficiary Cadets	40.00	35.00	----

UNIFORMS

A new cadet is equipped on the opening day of the session with a cap, two shirts, trousers, tie, belt and a pair of shoes. Additional measurements are taken for a raincoat and a uniform, consisting of blouse and trousers, which are issued to him within thirty days. Measurements are taken after the Christmas furlough for a full dress uniform consisting of coatee, trousers, shako, etc., which are issued by the 22nd of February. Duck trousers are issued by April 1st.

For the convenience of parents the cost of these uniforms is divided into two payments,—one at entrance, the other on December 1st. If a cadet should withdraw prior to December 1st, after having received his uniforms, the parent will be obligated to pay the balance due on them before a cadet can be discharged.

GRAY OVERCOAT

The purchase of a gray overcoat is optional. If one is desired an additional deposit of $36.00 should be included with the first payment September 21, 1929.

SPECIAL FEES

At the beginning of the session, all cadets make payments as follows: Books and stationery $15.00; Athletic fee, $10.00; Y. M. C. A. fee, (for Protestants), $3.00.

A Breakage fee of $5.00 is payable April 1st, 1930.

A Physics Laboratory fee of $2.00 is charged Freshmen, and a Chemistry Laboratory fee of $7.50 is charged Sophomores, Juniors and Seniors electing Chemical and Biological courses. These sums are not additional, being charged to the book and stationery account.

The hospital facilities at The Citadel are excellent, and all ordinary cases of sickness are treated by the surgeons and

nurses of the College without expense to the parent. Surgical cases, requiring the removal of a cadet to an infirmary in the City, services of a special nurse in the College hospital, and special treatment of eyes, ears, dental services, etc., must be paid for by the parent or guardian.

Every cadet is expected to take an interest in athletics, attend the games of football, baseball and basketball played in Charleston, and be a member of the Athletic Association.

OPTIONAL FEES

A system of Class Funds, under the regulation of the Director of Cadet Affairs and Cadet Council, has been established whereby a cadet can participate in all the social activities of the College at a minimum of cost. Besides the informal dances, five formal dances are given annually: Thanksgiving Hop, Christmas Hop, Senior Hop, Annual Picnic, and the Commencement Hop. The fee for membership in the Class Fund is $5.00, and while not required, is strongly recommended.

The Bull Dog is the official news organ of both the College and the Cadet Corps. Parents, also, will be interested in reading this paper, which is intended to reflect the activities and spirit of the institution. The subscription price is $1.50.

The Sphinx, the Cadet Annual, is the most important publication of the cadets, and is subscribed for by practically every member of the Corps. The price is $6.50.

MISCELLANEOUS

All cadets are required to furnish their own bed clothes. Bed steads and mattresses are provided by the College, but pillows are not furnished. A mattress cover will be issued at cost to each cadet. Cadets are also expected to come provided with underclothes. A list of these articles is given as follows:

Six shirts, without collars preferred.
Six suits of summer underwear.
Four suits of winter underwear.
Three nightshirts or pajamas.
Six pairs of black socks.
One dozen handerchiefs.
Six towels.
Two clothes bags about 36x42.
One pillow.
Three pillow cases.
Four sheets for single bed.
Two pairs of blankets.
One comfort.
One bathrobe.
Toilet articles.

Before the opening of the session, a new cadet is assigned a laundry number, which he retains as long as he remains at The Citadel. Clothing should be marked with name and full initials, as well as with laundry number, as follows: sheets, towels and handkerchiefs in the corner; pillow cases in corner at open end, collars on inside near center; shirts on bands near buttonhole at back of neck; socks on leg near top; other articles where most practicable.

Remittances should be made by money order or check, and made payable to, and sent by mail direct to E. M. Tiller, Quartermaster, in settlement of all fees.

PART II

REQUIREMENTS FOR ADMISSION

Applicants for admission to The Citadel must be not less than sixteen nor more than twenty-one years of age. They must be at least five feet high and physically able to do military work.

Formal application for admission must be submitted by parent or guardian on the blank provided for that purpose and should be mailed to the Registrar not later than September 1st.

The requirements for admission to the Freshman Class are those prescribed by the Association of Colleges and Secondary Schools of the Southern States, of which The Citadel is a member. The standards of the Association require "the satisfactory completion of a four-year course of not less than fifteen units in a secondary school approved by a recognized accrediting agency, or in a secondary school that is a member of this Association, or the equivalent of such a course as shown by examination."

In accordance with the above, applicants are admitted to The Citadel either by certificate or by examination. Certificates are accepted only from accredited schools, and should be submitted directly to the college by the principal or superintendent of such school. The certificate must give evidence of the satisfactory completion of a four-year high school course covering at least fifteen units, including those specifically required for entrance to The Citadel.

A unit represents a year's study in any subject in a secondary school constituting approximately a quarter of a full year's work.

No conditions are allowed.

Examinations for admission to the Freshman Class will be held at The Citadel on September 19, 20 and 21. Permission to stand these examinations must be secured from the Registrar prior to that date.

GROUP I.—REQUIRED UNITS

The following units are required:

English	4
United States History	1
History (Ancient, Modern, or English)	1
Algebra	2
Plane Geometry	1
Science	1
Total required subjects	10

GROUP II.—ELECTIVE SUBJECTS

In addition to the above, candidates must present at least five (5) units from the following list:

Ancient History (If not presented in Group I.)	½ or 1
Modern History (If not presented in Group I.)	1
English History (If not presented in Group I.)	1
Civics (If not included with U. S. History)	½
Community Civics	½
Latin	2, 3, or 4
French	1, 2, or 3
German	1, 2, or 3
Spanish	1, 2, or 3
Solid Geometry	½
Plane Trigonometry	½
Physics	1
Chemistry	1
General Science	½ or 1
Physical Geography	½ or 1
Botany	½ or 1
Zoology	½ or 1
Bookkeeping	1, or 2
Stenography and Typewriting	1
Commercial Arithmetic	½
Commercial Geography	1
Commercial Law	1
Mechanical Drawing	1
Agriculture	1, or 2
Shop Work or Manual Training	1, or 2
Elementary Mechanics	1, or 2

NOTE: Not more than two (2) units in vocational subjects are allowed, nor more than two in commercial subjects.

ADVANCED STANDING

The course of study for the first two years at The Citadel is rigidly prescribed, and no student will be accepted as a candidate for a diploma who has not had this work, or its equivalent. It is therefore recommended that reference be made to the course of study for the Freshman and Sophomore years, as outlined in this catalog, before application is made for advanced standing.

Applicants for advanced standing must present an honorable discharge from the college previously attended together with a transcript of their college record and entrance credits. It is also advisable to submit a copy of the college catalog, in which the applicant has marked the courses which he has taken.

BENEFICIARY SCHOLARSHIPS

The State of South Carolina appropriates annually twenty thousand dollars for the support of seventy-eight cadets in the college. These scholarships are distributed among the various counties as shown on pages 39 and 40.

Notices of vacancies in these scholarships are advertised in the month of May of each year in the newspapers of the counties concerned, and also in the leading State daily papers. Applications for these beneficiary appointments must be made upon printed forms furnished by the President of The Citadel, and must be filled out in every particular and returned to the President at The Citadel, who will submit them to the State Board of Public Welfare for examination and recommendation.

As it is the intention of the State to limit the beneficiary appointments to worthy young men without means of obtaining a college education, certificates of inability to pay are required in these applications.

The following are not eligible for beneficiary scholarship appointments:

(a) A person who during the current year has won or holds a scholarship at another State institution.

(b) A person who has been in attendance at The Citadel or "any other institution of higher learning known as a College or University," provided, however, that this condition shall not apply if there are no other applicants for the scholarship.

(c) A person who has forfeited a scholarship at The Citadel or any other State institution by failure to maintain himself.

Applicants to be eligible must not be less than sixteen years of age nor more than twenty-one years of age on September 20th. They must be at least five feet in height, physically able to do military duty, of good moral character, and must show in their certificates that they are financially unable to go to college at their own or parents' expense.

In all counties where vacancies occur, competitive examinations will be held on the second Friday in July by the County Superintendent of Education, and awards will be made to the applicant making the best grades, if they are otherwise eligible.

The following information concerning the scope of the examinations is furnished prospective candidates:

MATHEMATICS

The examination of Algebra will cover the operations through the binomial theorem as given in any text-book in common use, and will lay particular stress upon factoring, solution of simple simultaneous equations, square and cube root, theory of exponents, and quadratic equations. In Plane Geometry, the examination will be given on the elementary propositions of the first five books.

ENGLISH

ENGLISH GRAMMAR—The examination in this subject will include spelling, punctuation, the various constructions of the parts of speech, and the analysis of the English sentence.

ELEMENTARY RHETORIC—The examination in this subject will be based upon the use of words in the sentence, the structure of the sentence, and the various methods of developing the paragraph. In addition to this, the applicant must have a fair knowledge of narration, description, and letter-writing.

LITERATURE—It is expected that the applicant will be familiar with some of the best literature, in both prose and poetry, and with the lives of the authors.

HISTORY

HISTORY OF THE UNITED STATES—The candidate should be prepared to name the European countries that took part in exploring and settling North America, and give an account of the founding of the principal colonies in what is now the United States. He

should be able to tell what were the chief occupations of the people in those colonies, to give an account of the colonial wars, and to discuss the trouble of the English colonists with the mother country. He should know the causes and results of the principal wars to which the United States has been a party, and be able to give a chronological account of the chief events of each. He should be prepared to show a knowledge of social and industrial changes, more especially those of the last fifty years, and to name the presidents in order, and give a discussion of one or more important events in the administration of each. Some such text as Hart's *Essentials in American History* is recommended.

ANCIENT HISTORY—The candidate should be able to give a chronological account of the rise and fall of the various oriental nations, and to explain what they contributed to the European world. He should familiarize himself with social and political conditions and changes in ancient Athens and Sparta; and should be able to show knowledge of the culture of the ancient Greeks; and to indicate what the modern world owes them. The period from the opening of the Persian wars through the break-up of Alexander's Empire should be thoroughly studied. In Roman history, the candidate should be able to give an account of the governmental changes in the Roman world, to the founding of the Empire, and should be able to tell how Rome expanded over Italy and then over the Mediterranean world. He should be able to name the principal emperors, and give an important event in the reign of each, and to explain the decay and fall of the Empire. The text by Myers is recommended.

E. W. McIntosh—Florence, S. C.
C. R. Willard—Spartanburg, S. C.
G. R. Weeks—Charleston, S. C.

DEPARTMENTS OF INSTRUCTION

COURSES AND DEGREES

The courses in the freshman and sophomore classes are prescribed, and are the same for all students. At the beginning of the junior year, students are offered optional courses in civil engineering, chemistry, physics, and electricity, pre-medical preparation, literature, history, and languages, and business administration.

The session of thirty-six weeks is divided into two equal semesters. The unit of credit in the various courses is one hour a week for one semester—two hours of laboratory being counted as one. The standard course is one which has a semester credit of three; that is, a course which is taken three hours a week for one semester of eighteen weeks.

The work of a semester is graded as follows: four monthly grades, each of a maximum value of one hundred, are recorded, based on the daily class-room work. At the end of the semester, an examination is held covering the entire ground gone over during the four months, the maximum mark being two hundred. The semester grade is then found by averaging the monthly and examination marks.

The passing grade is an average of seventy. A student who has a passing grade on at least half of his courses and no average below sixty, will receive full credit for the work of the semester. An average of less than sixty, but more than fifty, will be marked "conditioned." No credit will be given nor condition allowed for a course in which the student's average is below fifty; but he will be required to repeat the course and make a satisfactory record in order to receive credit. No student will be advanced to a higher class with more than one "conditioned" course.

The monthly and semester percentages will be published only approximately by letter grade: A, representing an average of 90 to 100; B, 80 to 90; C, 70 to 80; D, 60 to 70; E, 50 to 60; F, below 50.

A minimum total of 148 semester hours, or 74 credit hours, is required for graduation.

The degree of Bachelor of Science is awarded upon the satisfactory completion of courses in engineering, science, and business administration. The degree of Bachelor of Arts is awarded upon the completion of the literature courses.

The degree of civil engineer is awarded to graduates in engineering after at least three years of responsible work in their profession and the submission of a satisfactory thesis on some engineering subject.

CHEMISTRY

NOTE.—For information in detail about the courses, see following pages.

Year	Subject	Courses	Clock Hrs. Rec.	Clock Hrs. Lab.	Semester Hours

DEPARTMENT OF BIOLOGY

MAJOR KNOX

Only one course is offered in this subject. This course is designed primarily for the benefit of those students intending to undertake the study of medicine. With this in view, the course has been designed to collaborate with the requirements for admission to the medical colleges. However, the general cultural importance of this field of knowledge needs no emphasis and it would be advisable that, at least one course in this subject should be undertaken by all students who find it possible to do so.

Course 1. ELEMENTARY ZOOLOGY.—Required of all seniors electing the chemistry biology course. Elective to all juniors and seniors. Lectures, two hours a week; laboratory, four hours a week.

This course consists in the study of the various groups of animal organisms from the standpoint of anatomy, physiology, and phylogenetic and ecological relationships. The ordinary routine of the class-room is, from time to time, varied by special lectures on many of the broader aspects of the subject, such as heredity, the cycle of the germ-cell, the pathogenic relationship of many organisms and many other of like character.

In the laboratory, the student undertakes individual microscopic examinations and dissections of representative types of the various groups.

Text Book: "Manual of Zoology," Parker and Haswell; "Invertebrate Zoology," Gilman A. Drew.

DEPARTMENT OF CHEMISTRY

MAJOR LOUIS KNOX, PROFESSOR
LIEUTENANT R. M. BYRD, ASST. PROFESSOR
LIEUTENANT J. H. WATKINS, ASST. PROFESSOR

The Chemical laboratory at The Citadel is one of the best appointed in the South, embracing commodious, well-ventilated laboratories and lecture rooms equipped with the most modern furnishings and appliances for the comfort of the student and the efficiency of his work. The equipment and supplies are, at all times, maintained to allow the carrying out of a wide range of experimentation.

Students majoring in chemistry are required to take all of the courses offered by the department and in addition they are earnestly advised to elect calculus and German (Course 2, scientific German), and, if possible, geology and physics should be included as an elective. Pre-medical students are required to take the first four courses in Chemistry and Biology 1. They should elect Physics 2 and German 2, and, if possible, Geology should be included.

The department of chemistry offers the following five standard college courses:

Course 1. ELEMENTARY CHEMISTRY.—Required of all sophomores. Lectures, two hours a week; laboratory, two hours a week. Lieutenant Byrd and Lieutenant Watkins.

No knowledge of the subject is prerequisite for entrance in this course.

The more commonly occurring elements, their properties, modes of preparation and occurrence, and their individual behaviors and chemical relations are considered and, as the student grows in breadth of detail, the underlying theoretical conceptions are carefully introduced and emphasized.

The student is provided with a text-book and laboratory manual, and these are supplemented with demonstrated lectures and class-room discussions.

In the laboratory, the student is assigned a desk where he undertakes individual experiment illustrative of the class-room discussions. He is required to keep a note-book which is periodically inspected.

Text-book: "Intermediate Chemistry," Alexander Smith; "Laboratory Outline," by the same author.

Course 2. GENERAL COLLEGE CHEMISTRY.—Required of all juniors who elect chemistry, elective to all other juniors and seniors. Lectures, two hours a week; laboratory, two hours a week. Major Knox.

Course 1 is required of all of our sophomores and is, thus, designed to meet the requirements of all broadly educated men. However, the time devoted to the subject and the elementary character of the work in this course is deemed inadequate as a foundation in general chemistry on which to build the superstructure of higher attainments in this field of knowledge. Course 2 is, therefore, an extension of Course 1. The study of reactions and principles is, at all times, more thorough-going and detailed than in the preceding course. Considerable attention is directed toward the physical side of chemical action and, throughout the course, problems bearing on the different principles under discussion are assigned. The late views of atomic structure are adopted and chemical affinity, ionization, valence and other phenomena are interpreted along these lines.

In the laboratory, quantitative experiments, such as the determination of equivalents and molecular weights, the measurement of osmotic pressures, freezing point depressions, the conductivity of electrolytes and many others of like character are freely undertaken.

Text-books: "Smith's College Chemistry," James Kendall; "A Laboratory Outline for College Chemistry," the same author.

Course 3. QUALITATIVE ANALYSIS.—Required of all juniors electing the chemistry course. Elective to all juniors and seniors who either elect or have completed Course 2. Lectures, one hour a week; laboratory, four hours a week. Lieutenant Byrd.

This is a course of instruction in the qualitative detection of unknown substances. The student is first given simple "unknowns" containing one or two metals. He acquires the methods whereby he may separate the different metals into groups and the manner in which these groups may be further resolved into individuals and the various reactions by which these individuals may be recognized. Following this he undertakes a similar study of the various common acids. As his skill and understanding advance, he is given more or less complex commercial products and naturally occurring substances, such as portland cement, limestone, phosphate rock, iron ores, etc., for analysis.

No better vehicle exists for the exhibition of practically the entire range of chemical principles than the study of qualitative analysis, employing, as it does, correct conceptions of hydrolysis, amphoterism, mass-action and equilibrium, and many other principles too numerous to mention. This aspect of the study is freely recognized and, at no time, does this course resolve itself into a blind rule of thumb execution of analytic processes, but the greatest emphasis is, at all times, laid on the full comprehension of the various reactions employed and of the principles they illustrate.

Text-book: "Qualitative Analysis," Olin Freeman Tower.

Course 4. ORGANIC CHEMISTRY.—Required of all seniors electing chemistry for their major subject and of all seniors who propose to take up the study of medicine. Elective to all other seniors who have completed Course 2. Lectures, two hours a week; laboratory, two hours a week. Major Knox.

This course consists of the study of the various well-recognized groups of organic compounds, such as the paraffins, alcohols, fatty acids, amines, sugars, etc. Great emphasis is directed toward general reactions. Whereas, the purpose of the course is primarily to develop theoretical comprehension and practical experimental skill in the field of pure organic chemistry, still, wherever feasible, discussions bearing on the practical application of this knowledge to the commercial or pathological side of life are undertaken.

In the laboratory, the student carries out syntheses and other experiments paralleling the theoretical considerations involved.

This course, together with the three preceding courses, completes the pre-requisite training for those who propose to study medicine or pharmacy and affords excellent additional equipment to those who propose to teach chemistry or who expect to enter the technical field.

Text-books: "Theoretical Organic Chemistry," Julius B. Cohen.

Course 5. QUANTITATIVE ANALYSIS.—Required of all seniors electing chemistry as their major subject. Elective to others who have completed course 2 and 3. Lectures, one hour a week; laboratory four hours a week. Major Knox.

The course consists in the development of skill in carrying out the common quantitative determinations of substances. As the student grows in skill in the ordinary standard methods, he is given more and more complex materials for analysis such as many of the ordinary natural and commercial products. Both gravimetric and volumetric methods are employed. In the lecture room, the various methods and their underlying principles are freely discussed and many intricate stoichiometric problems are analyzed and solved.

This course rounds out the training for those cadets who intend to enter the field of pharmacy or who aspire to enter chemical laboratories as assistants.

Text-books: "Quantitative Chemical Analysis," Henry P. Talbot.

GEOLOGY

LIEUTENANT WATKINS

Course 1. ELEMENTARY GEOLOGY.—Elective to all juniors and seniors. Lectures, three hours a week.

The course begins with the study of dynamic geology or the movements of the earth's crust and the igneous influences to which it is continually being subjected. Destructive processes such as the work accomplished by weathering, running water, the wind, and snow and ice are all considered. Following this comes the consideration of structural geology involving an investigation into the character of the rocks, both igneous and sedimentary, that constitute the earth's crust. Geomorphology or the physiographic aspect of the earth together with its contributing causes, is next considered. The course concludes with a survey of the historical aspects of the subject. The rocks of the great, well recognized time periods of the past are studied, together with the development and progress of life forms and the knowledge, so attained, is welded into a coherent history of events, culminating in our present planet.

Text-book: "An Introduction to Geology," W. B. Scott.

DEPARTMENT OF CIVIL ENGINEERING

MAJOR L. S. LE TELLIER, PROFESSOR
CAPTAIN JOHN ANDERSON, ASSOCIATE PROFESSOR
LIEUTENANT H. G. HAYNES, ASSISTANT PROFESSOR
LIEUTENANT F. B. FITCH, JR., ASSISTANT PROFESSOR

The Civil Engineering course is planned on the assumption that a liberal education is one of the requisites of a professional education, hence it will be found that the program offered in this department does not cover all of the subjects ordinarily offered in a full four-year course. About forty per cent. of the total time for the four years of the Civil Engineering course is given to languages, literature, history and economics; and the remainder of the time to foundational courses that underlie all engineering design. No attempt is made to give instruction in a wide range of specialized courses.

The object in this department is to acquaint the student with the principles of engineering, and to give him the power to apply these principles intelligently, rather than to work by rules and formulæ, the derivation and significance of which he does not understand. Such drawing-room and field practice is given as may be necessary to illustrate and enforce the lecture and recitation work, and to inculcate correct habits of accuracy, precision and good form in engineering practice.

EQUIPMENT.—During 1924 and 1925 large additions were made to the equipment of this department. A general testing laboratory for tests on concrete and other structural materials and a road materials laboratory were put into operation. These laboratories are equipped with 150,000 pound Olsen universal testing machine, with special tools and appliances for shear and bending tests and for accurate measurements of deformation of materials under load; several machine tools, including lathe, milling machine,

drill press, grinders, with the usual tools and appliances, Deval and Dorry machines, core drill press, impact machine, immersion tank, moist closet, cement machine, and various other small tools and appliances used in the testing of cement and road materials.

The equipment now installed is sufficiently complete to enable the Department to give instruction in making all tests ordinarily specified for both bituminous and non-bituminous materials, along with a fairly wide range of experiments on structural materials.

For the work in Surveying, the department is equipped with transits, levels, compasses, sextants, hand levels, aneroid barometer, and the usual accessories such as stadia and level rods, range poles, chains, tapes, targets, pins, et cetera.

Course 1a. SURVEYING.—Required of juniors in C.E. course. Three hours a week. Captain Anderson and Lieutenant Fitch.

Chaining, verniers, differential and profile leveling, compass surveying, transit surveying, note keeping, land survey computations, practical surveying problems, stadia, curves, topographic surveying, meridian determination, plane table, sextant, farm surveying, and adjustment of instruments.

At the end of February, the time alloted to Course 2b in Drawing (see under Drawing Department) is given to topographic drawing and thus merges with this course.

Text: Breed & Hosmer's "Surveying."

Course 1b. FIELD PRACTICE IN SURVEYING.—Required of juniors in C.E. course. Two hours a week. Captain Anderson and Lieutenant Fitch.

Text: Instructor's Notes.

Course 2a. ANALYTIC MECHANICS.—Required of seniors in C.E. course. Three hours a week; first semester. Major Le Tellier.

Statics, with special attention to framed structures; center of gravity, moment of inertia, friction, rectilinear motion, curvilinear motion, rotation, work and energy, and impulse momentum and impact. Calculus is a prerequisite to this course.

Text: Poorman's "Mechanics."

Course 2b. MECHANICS OF MATERIALS.—Required of seniors in C. E. course. Three hours a week; second semester. Major Le Tellier.

Beams, columns, shafts, elastic curve, combined stresses, compound bars and beams, and reinforced concrete stresses. This course is concerned largely with the application of principles expounded in Course 2a.

Text: Poorman's "Mechanics of Materials."

Course 3a. GRAPHIC STATICS.—Required of seniors in C. E. course. Two hours of recitations and two hours of drawing a week; first semester. Major Le Tellier.

Triangle of forces; composition, resolution and equilibrium of forces; funicular polygon, graphic moments, dead and wind loads; wall reactions; stress diagrams for cantilever and unsymmetrical trusses; counterbracing; three-hinged arches; towers; beams; bridges, and bridge loadings; and influence lines.

Text: Wolfe's "Graphical Analysis."

Course 3b. ELEMENTARY STRUCTURAL DESIGN.—Required of seniors in C.E. course. Two hours of recitations and two hours of drawing a week; second semester. Major Le Tellier.

The object of this course is to give an elementary knowledge of wood and steel construction as applied to simple roof trusses and highway bridges.

Properties of standard, structural shapes, use of hand-book, rivited joints, structural details, design and fabrication of simple steel structures, and examination of manufacturers' drawings.

Text: Conklin's "Elementary Structural Design."

Course 4a. ENGINEERING PROBLEMS.—Required of seniors in C.E. course. Three hours a week; second semester. Major Le Tellier.

A study of selected engineering problems and projects, with reports thereon, arranged to illustrate engineering methods of investigating, designing and constructing.

Course 4b. REINFORCED CONCRETE.—Required of seniors in C.E. course. Three hours a week; second semester. Major Le Tellier.

Elementary principles of reinforced concrete design and construction.

Text: Urquhart & O'Rourk's "Reinforced Concrete."

Course 5a. HIGHWAY ENGINEERING.—Required of seniors in C.E. course. Three hours a week; first semester. Captain Anderson.

This course is designed to give a broad general view of the science of highway engineering. The fundamental principles are emphasized. The subject is studied from the standpoint of modern practice in the fields of economics, administration, legislation, materials, and methods.

Text: Bateman's "Highways."

Course 5b. HYDRAULICS.—Required of seniors in C. E. course. Three hours a week; first semester. Captain Anderson.

Pressure of water on plane and curved surfaces; flotation; flow of water through orifices, over weirs and in pipes and open channels; practical application of hydraulic principles in various devises and structures.

Text: Russell's "Hydraulics."

Course 6. ENGINEERING LABORATORY.—Required of seniors in C.E. course. Three hours per week throughout the session. Major Le Tellier, Captain Anderson, and Lieutenant Haynes.

General materials testing alternating with road materials testing. Compressive, tensile, tranverse and shearing tests on steel, concrete, wood and other materials, with measurement of deformation by strain gauges and other instruments.

Standard tests and experiments on bituminous and non-bituminous road materials. See under Equipment, page 59, for a description of the equipment for use in this course.

Text: Hatt & Scofield's "Laboratory Manual."

DEPARTMENT OF DRAWING

MAJOR LE TELLIER
CAPTAIN ANDERSON
LIEUTENANT HAYNES
LIEUTENANT FITCH

This department gives a course in Drawing and Descriptive Geometry which is required of all cadets in the Sophomore Class, and more advanced specialized courses which are required of the juniors in the Civil Engineering course. The object of the former is to give a knowledge of the use of Drawing as a practical graphic language and to give the rigorous training derived from exercises in Descriptive Geometry, and of the latter to provide the usual training in Drawing required in Civil Engineering courses. In addition to the work given in this department, much drafting is required in some of the courses listed under the Department of Civil Engineering.

Course 1a. MECHANICAL DRAWING.—Required of all sophomores. Four hours a week; first semester. Lieutenants Haynes and Fitch.

Use and handling of instruments; useful geometrical constructions; conics; cycloids; lettering; elementary projection; pictorial representation.

Text: French's "Engineering Drawing."

Course 1b. DESCRIPTIVE GEOMETRY.—Required of all sophomores. Four hours a week; second semester. Lieutenants Haynes and Fitch.

Descriptive Geometry, pure and applied; problems on points, lines and planes; orthographic projection; auxiliary and revolved views; sections; intersections and developments.

Text: Kenison and Bradley's "Descriptive Geometry."

Course 2a. MACHINE DRAWING.—Required of juniors in C.E. course. Four hours a week; first semester. Captain Anderson and Lieutenant Haynes.

The object of this course is to give the civil engineering students as much training in machine drawing as may be regarded as a safe minimum for civil engineers.

Representation of bolts and nuts, screw-threads, springs, and other machine parts; detail and assembly drawing of some simple machine; tracing and blueprinting; and examination of manufacturer's drawings, with attention to drawing office system.

Text: French's "Engineering Drawing,"

Course 2b. TOPOGRAPHICAL DRAWING.—Required of juniors in C. E. course. Four hours a week; second semester. Captain Anderson and Lieutenant Haynes.

Map lettering, topographic symbols, plotting surveyors' notes, contouring, and mapping field notes made in C.E. Course 1 (see under Department of Civil Engineering).

Text: French's "Engineering Drawing."

EQUIPMENT.—This department is provided with modern adjustable drawing tables, locker cases, filing cases, blueprinting outfit, planimeters, pantograph, vernier protractors, universal drafting machine, mimeographing apparatus and the usual articles of minor equipment. The department maintains a file of mechanical, structural and topographical drawings obtained from engineers and architects, and another file of the best work done by cadets.

Files are provided in which cadets are required to keep all of their drawings, notes and other papers relating to their work.

SUPPLIES.—The department purchases and carries in stock all supplies and materials required in the drawing courses. These are furnished to cadets at cost, plus a small charge to cover freight and other expenses.

DEPARTMENT OF ENGLISH

MAJOR H. S. MC GILLIVRAY, PROFESSOR

CAPTAIN M. B. KENNEDY, ASSOCIATE PROFESSOR

LIEUTENANT J. G. HARRISON, ASSISTANT PROFESSOR

LIEUTENANT J. I. OWEN, ASSISTANT PROFESSOR

English is required of all students during the first two years, and is elective, as either a major or a minor study, in the junior and senior years. In each of these years, those majoring in English are required to take two three-hour English courses from those designated as open to juniors and seniors, the remaining hours to be made up as follows: In the case of juniors, English History (when offered), a junior modern language course, Military Science, and one course to be selected by the student; in the case of seniors, English History (or the history course alternating with this), a senior modern language course, and Military Science. See the tabulation of courses by elective groups, with values attached, on a preceding page.

All who take literature courses are required to hand in each month written reports on parallel readings. The papers are graded and errors found are discussed in class. Parallel assignments thus become an important supplement to the regular courses in Composition, Rhetoric, and Literature.

Course 1. RHETORIC AND COMPOSITION.—Three hours a week throughout the year. Required of all freshmen. Lieutenants Harrison and Owen.

The aim of this course is to give the student a practical command of the English sentence and a reasonable mastery of good diction. The fundamentals of grammar are carefully reviewed and special stress is laid upon spelling, punctuation, capitalization, and errors in the use of English. Much time is devoted to

theme writing in addition to frequent written exercises, weekly themes on familiar topics being assigned.

Text-books: Foerster and Steadman's "Sentences and Thinking," Kittredge and Farley's "Concise English Grammar," Scott and Zeitlin's "College Readings."

Course 2a. TYPES OF LITERATURE.—Two hours a week throughout the year. Required of all sophomores. Major McGillivray, Captain Kennedy.

The more important literary types—the essay, the short story, the novel, the drama, lyrical forms—are studied with a view to giving the student an understanding of and a liking for, the principal literary species. Parallel assignments.

Text-books: A volume of short-stories, a novel, a volume of essays, a Shakespeare play, "The College Book of Verse."

Course 2b. RHETORIC.—One hour a week throughout the year. Required of all sophomores. Major McGillivray.

In the Sophomore Class, the course consists of studies in paraphrasing, title making, sentence summaries, abstracts, and outlines, accompanied bi-weekly themes.

Course 3. SHAKESPEARE.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

This course embraces lectures on the Elizabethan stage, lectures on Elizabethan English, a careful study of the more significant plays, and parallel readings of the less significant.

Course 4. PUBLIC SPEAKING.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

Assignments and discussions are followed by practice in speaking.

Text-books: Ketcham's "Argumentation and Debate," "The Century Vocabulary Builder," and various magazines.

Course 5. ENGLISH LITERATURE FROM BEOWULF TO BURNS.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

In this survey course stress is laid on readings and discussions of principal works, rather than on literary history. Parallel assignments.

Text-book: "Century Readings in English Literature," or a similar text.

Course 6. ENGLISH LITERATURE IN THE NINETEENTH CENTURY.—Three hours a week throughout the year. Open to juniors and seniors. Major McGillivray.

Text-books: "Century Readings in English Literature" or a similar text; "Century Readings in American Literature."

N.B.—*Courses 3* and *6* and *Courses 4* and *5* are given in alternate years. In 1929-30 *Courses 5* and *6* will be given.

DEPARTMENT OF HISTORY

MAJOR S. J. WILLIAMS, PROFESSOR
CAPTAIN J. K. COLEMAN, ASSOCIATE PROFESSOR
LIEUTENANT R. M. LYON, ASSISTANT PROFESSOR
LIEUTENANT ST. J. R. CHILDS, ASSISTANT PROFESSOR
LIEUTENANT G. P. SMITH, ASSISTANT PROFESSOR

History is required of all students during the first two years. In the junior and senior years history is elective. All students electing history in the junior year are advised to take course 6. Course 3 and 4 are given in alternate years. During 1928-1929 course 3 will be given.

Course 1. HISTORY OF MODERN EUROPE, 1500-1815.—Required of all freshmen. Three hours a week. Major Williams; Lieutenant Lyon, Lieutenant Childs, Lieutenant Smith.

After a brief survey of the Contributions of the ancient world and of the Middle Ages to European civilization, the course proper deals with the important political, economic and intellectual achievements from the opening of the sixteenth century to the close of the eighteenth. It treats of the spirit of reform and revolt, the expansion of Europe and the various aspects of the "old regime." Throughout the course, everything touching English and American history is duly emphasized.

Text-book: Hayes's "Social and Political History of Modern Europe," Vol. I.

Course 2. HISTORY OF MODERN EUROPE, 1815-1924.—Required of all sophomores. Three hours a week. Captain Coleman, Lieutenant Childs, Lieutenant Smith.

The work in this class is a continuation of that begun in the Freshman Class. The text is supplemented by lectures to a greater extent than in Course 1, and more importance is attached to collateral reading. Special attention is paid to the Industrial Revo-

lution, the rise of nationalism in Germany and Italy, the revolutionary influences of France, and the political progress of England. A careful study is made of the causes of the Great War and the temporary settlement of 1920. Throughout the course, attention is directed to the conditions under which the various movements were carried on. As in the preceding course, everything touching English and American history is stressed.

Text-book: Hayes's "Social and Political History of Modern Europe," Vol. II.

Course 3. ENGLISH HISTORY.—Open to juniors and seniors. Three hours a week throughout the year. Major Williams.

A careful study of the history of England from its origin to the present time is attempted. Special attention is given to the formation of the English constitution in the Middle Ages, to the growth of the limited monarchy, and to the evolution of Parliament. Emphasis is given to the characteristic institutions of the English political system and their influence upon other peoples. Throughout the course the social and economic factors which conditioned political changes are stressed. Parallel assignments.

Text-book: To be selected.

Course 4. AMERICAN HISTORY.—Open to juniors and seniors. Three hours a week throughout the year. Lieutenant Lyon.

This course is devoted to a general study of American history from the period of British Colonial administration to the present. Emphasis is laid upon the conflict of imperial colonial interest in order to understand the underlying causes of the Revolution and the growth of the spirit of independence and union. Special attention is given to the growth of the West, the development of sectional interest, and the territorial, constitutional, and social aspects of the great conflict over slavery. The gradual change of emphasis from questions growing out of this conflict and Recon-

struction to the problems arising from the rapid economic and industrial development of the nation is carefully traced. Collateral reading and written reports on assigned topics are required.

Text-books: Muzzey's "United States of America," Vol. I; Lingley's "Since the Civil War."

Course 5. AMERICAN DIPLOMACY.—Open to seniors and juniors. Three hours a week throughout the year. Major Williams.

This course is devoted to a study of international relations, including a survey of the general diplomatic situation at the outbreak of the Revolution; American relations with Europe, 1783-1814; Spanish-American revolutions and the Monroe Doctrine; annexations and boundary disputes; foreign relations, 1865-1898; Pan-Americanism; the United States as a world power. Collateral reading and written reports on assigned topics are required.

Text-book: Latane's "American Foreign Policy."

Course 6. INTERNATIONAL RELATIONS.—Three hours a week throughout the year. Open to juniors and seniors. Lieutenant Lyon. (Not given in 1929-30.)

The aim of this course is to give a comprehensive survey of the basic factors of world politics; of pre-war diplomacy and of post-war conflicts regarding raw materials, concessions, colonies, protectorates and spheres of influence. All students who are members of the International Relations Club are advised to take this course.

Text: Moon's "Imperialism and World Politics."

Course 7. AMERICAN GOVERNMENT AND POLITICS.—Open to juniors. Three hours a week throughout the year. Captain Coleman.

This course embraces the study of the origin, growth, and development of our government and institutions in both Federal and

State Governments. The history and influence of parties; the electoral procedure; the organization and functioning of Congress; and the interrelation of State and National Governments are especially emphasized.

The aim of this course is not only to give the student a clear understanding of the operation of the machinery of his government but also to give him an insight into the responsibilities of citizenship.

Text: Ogg and Ray's "American Government."

DEPARTMENT OF MATHEMATICS

COL. O. J. BOND, PROFESSOR
CAPT. C. L. HAIR, ASSOCIATE PROFESSOR
CAPT. C. F. MYERS, JR., ASST. PROFESSOR
CAPT. L. A. PROUTY, ASST. PROFESSOR
LIEUT. J. A. SAUNDERS, ASST. PROFESSOR
LIEUT. E. C. SEABROOK, ASST. PROFESSOR

The course in mathematics for the first two years is required of all freshmen and sophomores. In the junior year, it is required of those students only who elect courses in engineering and physics. The courses in the senior year are elective for students in engineering and the science courses.

Course 1a. COLLEGE ALGEBRA, SOLID GEOMETRY.—Required of all freshmen. Five hours a week; first semester. Captain Myers, Captain Prouty, Lieutenant Saunders, Lieutenant Seabrook.

At the beginning of the first semester, a short review is made of the elements of algebra, after which some of the topics of higher algebra are studied, and also a brief course in solid geometry.

Text-books: Hart's "College Algebra:" Young & Schwartz, "Solid Geometry."

Course 1b. TRIGONOMETRY.—Required of all freshmen. Five hours a week; second semester. Captain Myers, Captain Prouty, Lieutenant Saunders, Lieutenant Seabrook.

The second semester is given up to a study of trigonometry, and its applications principally to problems in mensuration and surveying.

Text-book: Wentworth-Smith's "Plane and Spherical Trigonometry."

Course 2. ANALYTIC GEOMETRY.—Required of all sophomores. Three hours a week, both semesters. Captain Hair, Captain Myers.

At the beginning of the first semester, a short course of about four weeks is given in spherical geometry, after which plane and solid analytic geometry is studied until the end of the session. A thorough study of the straight line and the conics is made, and much practice given in exercises requiring the analytic method.

Text-book: Wilson and Tracy's "Analytic Geometry," (revised.)

Course 3. THE CALCULUS.—Required of juniors electing engineering and physics. Three hours a week; both semesters. Colonel Bond.

The differential calculus is studied from the viewpoint of the theory of limits. In this, and also in the integral calculus which follows it, the application of the principles and methods of the calculus to practical problems in engineering and science is particularly considered.

Text-book: Love's "Differential and Integral Calculus."

Course 4a. DIFFERENTIAL EQUATIONS.—Elective in senior year to those who have taken course 3. Three hours a week; first semester. Colonel Bond.

A study is made of the various types of differential equations of the first and second order in connection with practical problems in mechanics, physics, and other topics.

Text-book: Phillip's "Differential Equations."

Course 4b. ASTRONOMY.—Senior Elective. Three hours a week; second semester. Colonel Bond.

A course in the elements of practical astronomy, with special attention to the problems which bear on the profession of the engineer.

Text-book: Hosmer's "Practical Astronomy."

MILITARY DEPARTMENT

MAJOR WILLIAM C. MILLER, INFANTRY, U. S. A.

PROFESSOR OF MILITARY SCIENCE AND TACTICS

Infantry Unit

ASSISTANT PROFESSORS OF MILITARY SCIENCE AND TACTICS

CAPTAIN LEWIS SIMONS, INFANTRY, U. S. A.

CAPTAIN ALSTON DEAS, INFANTRY, U. S. A.

FRESHMAN CLASS—THEORETICAL INSTRUCTION

The National Defense Act and the R. O. T. C.—Orientation of the student in the provisions of the National Defense Act, in the mission of the R. O. T. C. as provided in that Act, and in the objectives of the R. O. T. C. course.

Military Courtesy and Discipline—To inculcate respect for, and loyalty to, constituted authority, this course starts with the student's first day at The Citadel, and continues throughout his four years.

Drill and Command.—School of the soldier, squad, platoon, and company, in close and extended order phases; preparation of the Infantry pack; display of equipment; pitching of shelter tents.

Rifle Marksmanship—Instruction and training in the principles of rifle marksmanship with a view to forming proper shooting habits and methods preliminary to and during small-bore firing; nomenclature, care and cleaning of the rifle.

Scouting and Patrolling.—Instruction in the duties of a member of a patrol and a scout in elementary tactical situations.

Military Hygiene and First Aid.—Personal hygiene; preventive measures against disease and infection; preventions and control of epidemics; first aid to the injured, and resuscitation; hygiene of the barracks, kitchen, and camp; foods and their preparation.

SOPHOMORE CLASS—THEORETICAL INSTRUCTION

Drill and Command.—Review and continuation of the first year's course, with emphasis on the development of the student as a leader.

Musketry—Theory of fire; fire control and fire discipline; direction of fire of the squad and section in combat.

Automatic Rifle.—Nomenclature, care, mechanical functioning, positions, and combat use of the Browning Automatic Rifle.

Scouting and Patrolling.—Conduct of patrols, and duties of patrol leaders and scouts.

Combat Principles, the Rifle Squad.—Development of leaders of squads in battle.

Interior Guard Duty—Duties of various members of a typical garrison guard, with emphasis on the responsibilities of officers and non-commissioned officers.

JUNIOR CLASS—THEORETICAL INSTRUCTION

Map Reading and Military Sketching.—Instruction necessary to qualify the students to read military maps with facility, and to prepare them to accurately carry out practical work in military sketching; elementary instruction in the interpretation of aerial photographs.

Drill and Command.—Review and continuation of the previous two years' courses, with emphasis on the further development of leaders.

Machine Gun.—Nomenclature, care, and mechanical functioning of the machine gun; determination of fire data, and methods and means of fire control; going into and out of action on varied ground.

37-mm Gun and 3-Inch Trench Mortar.—Nomenclature, care, and mechanical functioning of these weapons; determination of fire data, and methods and means of fire control; going into and out of action.

Combat Principles.—The rifle section and platoon.—Development of leaders of sections and platoons in battle.

SENIOR CLASS—THEORETICAL INSTRUCTION

Military Law and Officers' Reserve Corps Regulations.—Jurisdiction of military tribunals; organization and procedure of courts-martial; rules of evidence; moot court. The basic regulations governing officers of the reserve element of the National Defense structure.

Military History and Policy.—An outline of the history of the wars of the American Republic, and illustrative campaigns and battles; evolution of the military policy of the United States.

Administration.—Preparation and maintenance of the records of the company; troop discipline, property, messing, troop sanitation, and the care of men.

Military Field Engineering.—Elements of field engineering, to include standard types of field works, organization of working parties and tasks, selection of location of trenches, concealment and camouflage applied to Infantry, and stream crossing expedients.

Drill and Command.—Review and continuation of the previous courses in this subject, with the objective of qualifying the students to perform the duties of platoon and company commanders at drills, ceremonies, and physical drills, with especial attention to the development of the qualities of leadership and methods of handling and instructing men.

Combat Principles.—The rifle and machine gun companies, and the howitzer platoon.—The development of leaders of these units in battle.

PRACTICAL INSTRUCTION COMMON TO ALL CLASSES

Interior Guard Duty.—Performance of actual tours of guard duty by all cadets in rotation during each of the four cadet years, carrying out duties appropriate to the cadet rank of the individual.

Military Courtesy and Discipline.—Practical application of the principles of military courtesy and discipline, as taught in the class-room, throughout the four cadet years.

Drill and Command.—Frequent daily formations, daily drills, weekly inspections of arms and barracks, and prescribed ceremonies; tent pitching and field inspections.

Combat Principles.—Participation in combat formations and maneuvers; for juniors and seniors, estimates of situations, preparation of combat orders, and application of orders thus prepared.

Musketry.—Application of the principles of fire control and direction at maneuvers.

Rifle Marksmanship.—Small-bore range firing by teams selected from each of the four cadet companies and band, without regard to academic classes; for juniors, firing of the prescribed course with the Army service rifle.

PRACTICAL INSTRUCTION—FRESHMAN CLASS

Scouting and Patrolling.—Application, in elementary tactical situations, of the principles covering the duties and responsibilities of individual scouts and members of patrols.

PRACTICAL INSTRUCTION—SOPHOMORE CLASS

Automatic Rifle.—Stripping and assembling of the weapon; its use by the individual firer and in combination with other weapons.

Scouting and Patrolling.—Application on the ground of the principles of patrol leadership taught in the classroom.

Methods of Instruction.—The logical steps in the presentation of instruction matter in Infantry drill, and the application of these steps in the training of recruits.

PRACTICAL INSTRUCTION—JUNIOR CLASS

Map Reading and Military Sketching.—Making of sketches of actual terrain, to embody the basic principles taught in the classroom.

Machine Gun.—Drill of the machine-gun squad, section, and platoon; going into and out of action; combat use of the weapon; care and cleaning of the gun, and correction of stoppages.

37-mm Gun and 3-Inch Trench Mortar.—Solution of fire problems; drill of the squad and platoon; going into and out of action; combat use of the Howitzer Company weapons.

PRACTICAL INSTRUCTION—SENIOR CLASS

Military Law.—Procedure of a general court-martial, in the conduct of one or more moot court trials.

Military Field Engineering.—Construction of trenches and revetments; siting of defensive positions and works.

COAST ARTILLERY UNIT

ASSISTANT PROFESSORS OF MILITARY SCIENCE AND TACTICS:
MAJOR A. V. RINEARSON, JR., C. A. C., U. S. A.
1ST. LIEUT. G. J. LOUPRET, C. A. C., U. S. A.

FRESHMAN CLASS—THEORETICAL INSTRUCTION

The National Defense Act and the R. O. T. C.—Orientation of the student in the provisions of the National Defense Act, in the mission of the R. O. T. C. as provided in that act, and in the objectives of the R. O. T. C. course.

Military Courtesy and Discipline.—To inculcate respect for, and loyalty to, constituted authority. This course starts with the student's first day at The Citadel, and continues throughout his four years.

Drill and Command.—School of the soldier, squad, platoon and company, in close and extended order phases; preparation of the Infantry pack; display of equipment; pitching of shelter tents.

Rifle Marksmanship.—Instruction and training in the principles of rifle marksmanship with a view to forming proper shooting habits and methods preliminary to and during small-bore firing; nomenclature, care and cleaning of the rifle.

Scouting and Patrolling.—Instruction in the duties of a member of a patrol and a scout in elementary tactical situations.

Military Hygiene and First Aid.—Personal hygiene; preventative measures against disease and infection; prevention and control of epidemics; first aid to the injured and resuscitation; hygiene of the barracks, kitchen and camp; foods and their preparation.

Coast Artillery Instruction.—Instruction in rigging telephones; ammunition; nomenclature and care of the 155-mm GPF and 75-mm antiaircraft guns and the service of same. Qualification of the student as a trained private and second class gunner.

SOPHOMORE CLASS—THEORETICAL INSTRUCTION

Drill and Command.—Review and continuation of the first year's course, with emphasis on the development of the student as a leader.

Interior Guard Duty.—Duties of various members of a typical garrison guard, with emphasis on the responsibilities of officers and non-commissioned officers.

Coast Artillery Instruction.—Instruction in fire control systems for seacoast and anti-aircraft artillery; aiming and laying; relocation and identification of targets. Qualification of the student as a trained non-commissioned officer and first class gunner.

JUNIOR CLASS—THEORETICAL INSTRUCTION

Drill and Command.—Review and continuation of the previous two years' courses, with emphasis on the further development of leaders.

Map Reading and Military Sketching—Instruction necessary to qualify the student to read military maps with facility, and to prepare them to accurately carry out practical work in military sketching; elementary instruction in the interpretation of aerial photographs.

Coast Artillery Instruction.—Preparation and calculation of firing data for heavy and anti-aircraft artillery. Qualification of the student as an expert gunner.

SENIOR CLASS—THEORETICAL INSTRUCTION

Drill and Command.—Review and continuation of the previous courses in this subject, with the objective of qualifying the students to perform the duties of platoon and company commanders

at drills, ceremonies, and physical drills, with especial attention to the development of the qualities of leadership and methods of handling and instructing men.

Military Law, and Officers' Reserve Corps Regulations.—Jurisdiction of military tribunals; organization and procedure of courts-martial; rules of evidence; moot court. The basic regulations governing officers of the reserve element of the National Defense structure.

Administration.—Preparation and maintenance of the records of the company; troop discipline; property; messing; troop sanitation and the care of men.

Military Field Engineering.—Elements of field engineering to include standard types of field works, organization of working parties and tasks; selection of location of trenches; concealment and camouflage applied to infantry, and stream crossing expedients.

Motor Transportation.—Theory and operation of the internal combustion engine, and of motor vehicles. Employment of motor vehicles in military transportation.

Orientation.—Orientation for heavy artillery; seacoast engineering. This course is closely allied to that in the Civil Engineering Department, but for those not taking Civil Engineering, a more liberal course is given.

Artillery Tactics.—Instruction in the organization of artillery, its chain of command and communications; its role in the combat forces; employment in land and sea-coast warfare.

PRACTICAL INSTRUCTION—ALL CLASSES

Physical Drill.
Drill and Command.
Interior Guard Duty.

a. Freshman Class.

Second Class Gunners Instruction.—Description, care and operation of typical artillery weapons and appurtenances thereto, including care, storage and handling of explosives; mechanical maneuvers including rigging and vehicle driving.

b. Sophomore Class.

First Class Gunners Instruction.—Description, care and operation of typical coast artillery position finding systems and equipment; aiming and laying.

c. Junior Class.

Expert Gunners Instruction.—Operation of seacoast fire control equipment; practical problems in gunnery.

d. Senior Class.

Same as for Junior Class. In addition Seniors act as instructors for the other three classes in this work.

DEPARTMENT OF MODERN LANGUAGES

MAJOR H. C. WINSHIP, PROFESSOR
CAPTAIN A. E. DUFOUR, ASSOCIATE PROFESSOR
LIEUTENANT R. H. DRIOULT, ASST. PROFESSOR
LIEUTENANT W. S. PRICE, ASST. PROFESSOR
LIEUTENANT R. HALLIDAY, ASST. PROFESSOR

All cadets are required to take French in the Freshman and Sophomore classes. In the Junior class all language courses are elective. A student with linguistic ability may continue French and elect either Spanish or German.

N. B.—None of the electives will be given unless the number of students applying warrants the formation of a section.

FRENCH

French I. ELEMENTARY.—Three hours a week, required of all freshman except those who elect French 1a. Lieutenant Drioult, Lieutenant Price, Lieutenant Halliday.

In this course the elements of French grammar are studied, and special attention is given to smooth translation, practice in grammatical forms, pronunciation and translation of exercises into French. The first 25 lessons of Aldrich, Foster and Roule's Elementary French grammar are completed, and during the second semester one period a week is devoted to reading a simple French text.

Text-books: Aldrich, Foster and Roule's; Elementary French Grammar; Hills and Dondo; Contes Dramatiques.

French 1a. Three hours a week. May be elected by Freshmen who enter with two or more years of French. Lieutenant Drioult.

This course is offered to those who prefer to utilize their knowledge of French in an advanced class, rather than stagnate in French 1. No extra credit is given. This course will not be given unless from 22 to 26 students elect it. Much stress will be placed on reading in this course. A rapid review of grammar will be made and drill in the irregular verbs given.

Text-books: Carnahan's "French Review Grammar." Rene Bazin; Contes Choisis, or a similar text.

French II. Three hours a week. Required of all sophomores except those who have completed French Ia. Captain Dufour and Lieutenant Drioult.

The stress in this course is on the translation of French texts. These are changed from year to year. Aldrich, Foster and Roule's is completed. The principal irregular verbs are thoroughly studied. Constant effort is made to perfect the student's pronunciation.

Text-books: Aldrich, Foster and Roule's; Beginners' French completed, Hugo; Notre Dame de Paris, or a similar text.

French IIa. Three hours a week. For those Sophomores who elected French Ia in the Freshman year. Lieutenant Drioult.

A continuation of course Ia.

Text books vary from year to year.

French III. Three hours a week. Junior elective. Major Winship.

This course introduces the student to French literature. The text-book upon which it is based is Harper's Anthology of French literature embracing selections from the most significant authors of the 17th, 18th, and 19th centuries. French III will consider authors only to the middle of the 18th century. A careful study is made of the various literary movements, and lectures are given

on each author studied. Collateral reading and reports are required. One hour a week in this course is devoted to composition and conversation.

Text-books: Harper's Anthology of French Literature.

Comfort: Practical French Composition.

French IV. Three hours a week. Open only to those seniors who have completed French III. Major Winship.

This course is a continuance of French III. The survey of French literature will begin with the middle of the 18th century and continue to the present. The same methods and text-books as in French III will be used. Composition and conversation once a week.

SPANISH

Spanish I. Three hours a week. Junior elective. Major Winship, Lieutenant Price.

A thorough grounding in the essentials of Spanish grammar is given in this course. Daily exercises in the translation of English into Spanish and Spanish into English are assigned. Verb blanks are filled out daily and at the end of the course all the principal irregular verbs have been learned. During the second semester one period a week is devoted to the reading of a Spanish text.

Text-books: Hills and Ford: A Spanish Grammar for Colleges. Reading texts vary from year to year.

Spanish II. Three hours a week. Senior Elective. Major Winship.

Two hours a week are devoted to reading in this course. A novel, a play and selections from Don Quixote constitute the reading matter. A constant effort is made to perfect pronunciation. The composition, to which one hour a week is devoted, consists of the writing of business letters. Ray and Bahret is the text generally used for this purpose.

German I. Three hours a week. Junior elective. Captain Dufour.

The object of this course is to give the student a thorough grounding in the essentials of German grammar, in pronunciation, in ability to translate from English into German. During the second semester, one period a week is devoted to the reading of a simple German text.

Text-books: Voss: Essentials of German, 5th Edition. Zeydel: Elementary German Reader.

German II. Three hours a week. Open only to those seniors who have completed German I. Major Winship.

Two hours a week are devoted to reading. A modern novel is read and the remaining time is devoted to scientific German.

Text-books: A novel (changed from year to year), Blochmann's Introduction to Scientific German, Voss' Essentials completed, White's Practical German Composition.

DEPARTMENT OF PHYSICS AND ELECTRICAL ENGINEERING

MAJOR N. F. SMITH, PROFESSOR

LIEUTENANT W. L. BRENNER, ASSISTANT PROFESSOR

LIEUTENANT C. T. RAZOR, ASSISTANT PROFESSOR

LIEUTENANT H. D. USSERY, ASSISTANT PROFESSOR

This Department occupies the entire second floor and part of the first floor of the east wing of the Administration Building. On the second floor are two lecture rooms, two general laboratories, apparatus rooms and laboratories for special purposes. On the first floor are located the work-shop, dynamo laboratory, and storage-battery room. The arrangement and equipment of the laboratories and lecture rooms is modern and complete. A good supply of apparatus and measuring instruments gives every needed facility for individual experiment and demonstration work.

To meet the needs of students who are looking forward to the profession of electrical engineering, courses in this subject are offered in the senior year. These together with the other courses in physics and required courses in mathematics, drawing and descriptive geometry, afford a good foundation for further study in this subject.

Students choosing Physics as a major subject must take all the courses offered in the department. Other students may elect any of the junior or senior courses for which they have the necessary preparation. Students majoring in Physics must take Mathematics, and are advised to elect Chemistry 2.

Course 1. ELEMENTARY COLLEGE PHYSICS.—Two hours a week lectures and recitations and two hours a week laboratory practice. Required of all freshmen. Major Smith, Lieutenants Brenner, Razor, and Ussery.

This course assumes no previous knowledge of Physics, and consists of lectures, demonstration experiments and problems presented as simply and directly as possible. It covers the subject of mechanics, heat and electricity. The laboratory work consists of about thirty individual quantitative experiments based on the fundamental principles of the topics studied in the lecture room.

Text-book: Stewart's "Physics."

Course 2. ADVANCED GENERAL PHYSICS.—Lectures and recitations. Three hours a week. Junior elective. Major Smith.

In this course special attention will be given to physical principles and problems related to engineering. The more difficult and mathematical phases of the subject which have been omitted from Course 1 will be taken up, thus rounding out the student's knowledge of general physics.

Text-book: Duff's "Physics."

Course 3. LABORATORY PHYSICS.—Six hours a week. Junior elective. Lieutenant Brenner.

Except for necessary explanation, discussion and problem work based on the experiments, the entire time of this course is devoted to work in the laboratory. The experiments are of a more advanced character than those included in Course 1, and involve the use of most of the standard instruments of physical measurement. About seventy experiments are performed, affording a study from the laboratory standpoint of most of the topics considered in Course 2.

Course 4. ADVANCED PHYSICS.—Lectures and recitations, three hours a week; laboratory work, six hours a week. Senior elective. Major Smith.

The subject matter of this course will be varied from year to year to meet the needs of the students electing it. The course for 1928-29 is as follows:

First Semester: Wave motion, sound and light. The general equations of wave motion are developed and a study is made of their application to sound and to all the forms of radiant energy.

Second Semester: The general principles of radio communication. As an introduction to this part of the course some time is spent on measurements of magnetic circuits, inductance and capacity. The remainder of the course is devoted to a study of the theory and practice of radio-telegraphy and telephony.

Text-book: Lauer and Brown's "Radio Engineering Principles."

Optional courses will be offered in other years in Thermodynamics, Physical Optics, or further work in electrical engineering.

Course 5. ELECTRICAL ENGINEERING.—Laboratory work, four hours a week; lecture or recitation, one hour. Senior elective. Major Smith and Lieutenant Razor.

In this course a study is made from the laboratory standpoint of the principal types of direct and alternating current generators and motors, and of motor-generators, rectifiers and transformers. The machines are operated under practical working conditions, and their characteristic curves obtained. The first half of the year is devoted to a study of direct current machinery, and the second half to alternating currents.

Text-book: Cook's "Elements of Electrical Engineering."

DEPARTMENT OF BUSINESS ADMINISTRATION

CAPTAIN C. ST. J. PHILLIPS, PROFESSOR

LIEUTENANT J. A. TIEDEMANN, ASSISTANT PROFESSOR

LIEUTENANT E. H. ANDERSON, ASSISTANT PROFESSOR

Modern business has become so large in the size of industrial units and so complex in its organization that it is no longer possible to learn, as it was formerly done, by the method of apprenticeship. Today no single industry or business can give so complete a training to its beginners as can be secured in the Department of Business Administration of a recognized College. It offers to the student the best opportunity to acquire a knowledge of the principles of industry and provides the training needed for their practice. The principles underlying business administration, those that were once learned by apprenticeship, can now be defined and taught more quickly than by the former method. It is the purpose of the Department to give the students a training not only in the fundamental principles of Business Administration, with accounting and economics acting as the base, but also to look for the significant facts and to use these facts in careful thinking on a particular problem.

ECONOMICS—Required of all juniors who elect Business Administration. It is an elective for all other students. Three hours per week; both semesters. Lieutenant Anderson.

This course is planned to give the student a systematic and comprehensive study of the principles of the economic science. It is intended for those who are preparing to enter law, government service or social work.

Text-book: Elementary Economics, Fairchild, Furniss and Buck.

Course 1. INTRODUCTORY ACCOUNTING. — Required of all juniors who elect Business Administration. Four hours per week; both semesters. Lieutenant Tiedemann.

The various forms of records which facilitate the recording and analysis of business transactions are discussed in detail. The primary emphasis of the course is placed on method of record a transaction and the preparation of reports from such records.

Text-book: Principles of Accounting, Volume 1, Kester.

Course 2. BUSINESS LAW—Required of all juniors who elect Business Administration. Three hours per week; both semesters. Lieutenant Tiedemann.

The course is planned to discuss in detail the subjects of fundamental importance for a successful business career; and to give a working knowledge of the fundamental legal terms.

Text-book:

SENIOR COURSES—ACCOUNTING GROUP

Course 3. ADVANCED ACCOUNTING.—Elective in senior year. Five hours per week; both semesters. Captain Phillips.

The course offered to those intending to enter some phase of the accounting field. A thorough study is made of the corporation, its accounting and financial problems. Attention being given to capital stock, its issue and redemption; treasury stock, no-par value stock, profits, reserves, sinking funds, combinations, consolidations and branch accounting.

Text-book: Principles of Accounting, Volume 2, Kester.

Course 4. COST ACCOUNTING.—Elective in senior year. Four hours per week; both semesters. Captain Phillips.

The course open to students who are taking course 3 or with permission of the instructor. A study of cost accounting records, methods and budget plans.

Text-book: Cost Accounting Theory and Practice, Dohr.

Course 3-a. PRINCIPLES OF SALESMANSHIP.—Elective in the senior year. Four hours per week; first semester. Lieutenant Tiedemann.

The fundamental principles of personal salesmanship are discussed. The different forms of sales are treated and illustrated with problems. Those who plan to take the Marketing group should take the course in psychology during the third year, because those facts of psychology that bear directly on the sales process, are discussed.

Text-book.

Course 3-b. PRINCIPLES OF ADVERTISING.—Elective in the senior year. Four hours per week; second semester. Lieutenant Tiedemann.

The course is devoted to a study of the history of advertising, its present development, the fundamental principles, psychological aspects of advertising, effects of the various forms of advertising on the customer, and methods for the investigation of the efficiency of advertising. Actual problems in advertising will be introduced at regular intervals.

Text-book.

Course 4-a. MARKETING PRINCIPLES.—Elective in the senior year. Four hours per week; first semester. Lieutenant Anderson.

The problems of the manufacturer in securing the proper channels of distribution are discussed. A study is made of the comparative value of different trade channels of distribution, analysis of the market for potential buyers, sources of statistical information, price determination and all the other factors dealing with the distribution of manufactured goods. Practical problems will be submitted to the class at intervals.

Text-book: Marketing Principles, Maynard.

SENIOR COURSES—MARKETING GROUP

Course 4-b. MERCANTILE CREDITS.—Elective in the senior year. Four hours per week; second semester. Lieutenant Anderson.

A practical study is made of the factors to be considered when credit is granted, and the routine of the credit and collection departments. In addition to explain the duties of those concerned with the granting of credit, there is considered in the course the foundation upon which credit rests. Many terms used in credit will be explained with great care.

Text-book: Industrial Credit, Young.

SENIOR COURSES—BOTH GROUPS

Course 5-a. BUSINESS ORGANIZATION.—Elective in the senior year. Four hours per week; first semester. Captain Phillips.

The course aims to train the students in effective methods of approach to administrative and executive problems related to production. Points discussed are location of industry and all the problems prior to the actual operations. The various methods of control and their applications to problems are discussed in detail.

Text-book: Business Organization and Management, Dutton.

Course 5-b. BUSINESS FINANCE.—Elective in the senior year. Four hours per week; second semester. Captain Phillips.

The course is a general survey of the function of Finance in business organization and operation, and a development of technique of financial analysis. The various forms of business organization are treated from the financial side of the subject. Various forms of credit, which business organization can use to raise finances are discussed. Problems are assigned to bring out the main points in each section, while the subject of investments is taken up very briefly at the close of the course.

Text-book: Business Finance, Lough.

Course 6. MONEY AND BANKING.—Elective in the senior year. Three hours per week; both semesters.

The course is a fundamental one for more advanced work in either banking or finance. The relation of a medium of exchange to the various causes of changes in price levels will be discussed in detail. The economic importance of the Federal Reserve Bank is brought out and a careful study is made of it. Consideration is finally given to the principles which should govern the operations of individual and the banking system. Price levels and credit are constantly kept before the student.

Text-book: Money, Bradford; The Banking Process, Rodkey; Problems in Banking, Fraser.

PSYCHOLOGY AND EDUCATION

CAPTAIN L. A. PROUTY, PROFESSOR
LIEUTENANT R. M. LYON, ASSISTANT PROFESSOR

Psychology 1. ELEMENTARY.—Elective for juniors and seniors. Three hours a week. Captain Prouty.

The course provides a general introduction to more advanced work in Psychology through study, lectures, and assigned reading. Beginning with the simpler types of reaction, the course proceeds to more complex phenomena of mental life, including instinct, emotion, sensation, attention, habit, association, perception, reasoning, the will and personality.

Text-book: "Psychology," R. S. Woodworth.

Psychology 2-a. SYSTEMATIC PSYCHOLOGY.—Elective for seniors who have credit for one year of Psychology. Three hours a week; first semester. Captain Prouty.

A study of the fundamental problems of Psychology regarded as science, and the application of psychological principles in various fields of human endeavor.

Psychology 2-b. GROUP PSYCHOLOGY.—Three hours a week; second semester. Captain Prouty.

A psychological study of the social life of man.

Education 1-a. EDUCATIONAL INSTITUTIONS AND PRACTICES.—Elective for juniors. Three hours a week; first semester. Lt. Lyon.

This course is intended to orient the student in his approach to the study of education. A historical survey will be made with special emphasis on American developments. The objectives of education, its organization, and present tendencies will be considered.

Readings and class reports will be required.

Education 1-b. PRINCIPLES OF TEACHING.—Three hours; second semester. Lieutenant Lyon.

The fundamental principles of teaching will be considered in this course. Intensive study of materials and methods best adapted to the teaching of some subject in the secondary school curriculum will be required of each student.

A term paper in the form of a course of study will be required.

Education 2-a. SECONDARY EDUCATION.—Elective for seniors who have had Education 1. Three hours a week; first semester. Lieutenant Lyon.

A study of the problems of administration and supervision in the high school from the point of view of the principal will be made. The question of education leadership, ideals, etc., will be considered. Business administration of schools, school house planning, building programs, plant maintenance and operation will be dealt with in the light of modern tendencies.

Readings and class reports will be required.

Education 2-b. TESTS AND MEASUREMENTS.—Three hours a week; second semester. Lieutenant Lyon.

This will be an introductory study of educational measurements. The work of the course is planned to give prospective teachers and principals the skill and practice which will enable them to carry out profitably in their own schools studies involving the simpler statistical methods and the use of standard tests.

Readings and class reports will be required.

NOTE: The above courses fulfil the requirements of the Southern Association of Schools and Colleges for Education. A part of paragraph (b), Article 4, of the Standards for Accrediting Secondary Schools 1926-1927 reads: "Beginning with the school year 1927-1928 all beginning teachers and principals shall have had not less than 12 semester hours' work in education."
